# Web design trends to avoid

Web designers follow various trends while designing websites. But some trends might be useless resulting in bad website layouts. In order to make the website reputable it is crucial to avoid certain trends in web designing

## Web designs trends to avoid

Pop ups

Auto-Play Videos

Too many fonts

Stock Photos

Poor Contrast

## **1. Pop ups**

Popups distract the users and result in leaving the site. It affects overall visual look.

## **2. Auto-play videos**

Videos are autoplayed while going through the website. Users may feel uncomfortable.

## **3. Too many fonts**

Its better to use two or three fonts in a website. Users become disoriented while going through too many fonts.

## **4. Stock photos**

Adding stock photos to a website might feel unprofessional. It's not good to add visual elements in site.

## **5. Poor Contrast**

Its difficult for the users to read the content inside in the website with poor contrast.
